

**The *Inside Story* of
Air Engineering High Performance Parts**

Air/Oil Separator

Featuring Air Engineering's proprietary Pleat Pak™ for the ultimate in performance.

Pleat Pak™ is completely encased in heavy-duty coated screen to prevent media migration

3-stage drain leg is more effective than single-layer design used by many compressor manufacturers

Heavy-gauge inner core offers double the strength of some manufacturer parts to resist collapse

Deep-dish end cap provides more positive collection of scavenged lubricant

Super-duty seam assembly is more than 3 times stronger than some manufacturer units to assure a leak-proof seam

Steel components are all heavy gauge with high-quality materials construction to resist breakdown from lubricant contact

Potting compound is specially designed to work with today's synthetic lubricants

Heavy-gauge grounding conductor prevents compressor flash fires

***When you know what's inside,
you'll want our name on the outside.***
